Silke

Silke? Smooooth...

Tony Daniel first made a name for himself with the debut of ***The Tenth***, his Image miniseries whose success paved the way for an ongoing series. From there, he spun off books like ***Adrenalynn*** that tied into the core concepts introducedin ***The Tenth***. Then came his hard-edged action-adventure team book ***F5***, also from Image. So when he came up with the concept for a new book, ***Silke***, it was only natural that he took it to...

Dark Horse!

"I outgrew Image Central," Daniel explained. "When I started to expand from ***The Tenth*** with titles such as ***Adrenalynn*** and ***F5***, I really needed to be part of a studio as opposed to being on my own at Image Central. I want to put out another book while I'm working on ***Silke***, like ***The Tenth*** for instance next spring, and that would've been very hard to do on my own." Working with Dark Horse freed Daniel from the business side of comics and enabled him to focus more on the creation of the book itself.

Silke focuses on a recurrent theme in Daniel's work: manipulation of innocents by powerful agencies that subsequently turn against them. ***The Tenth*** and ***Adrenalynn*** both played off this idea, as does this new series. "***Silke*** is about man's tampering with nature for the advancement of humankind," Daniel said. "In ***Silke***, we see what happens when we have too much information. It's our nature to want to play God, and very bad things can happen. The series is named after the lead character, Sandra Silke, who discovers not only that her genes have been re-coded, but that the people behind it have a secret plot to assassinate the President of the United States."

Daniel is confident that fans of his earlier work will be quite pleased with this new series. "I think ***Silke*** will have more mood, more action, and more horrific craziness than even ***The Tenth*** had. It's based a little more in the real world, so I can't go too crazy, but I plan to take the art to another level."

Silke isn't the only series that Daniel plans to do with Dark Horse. "The new Tenth series entitled ***The Tenth: Resurrected*** should debut in April with Dutch artist ***Romano***, who kicks serious butt." Further down the line, Daniel said, is "possibly a new ***Adrenalynn*** series."

While ***The Tenth*** will hold a special place in Daniel's heart—since it was after all his first hit creation—the writer/artist admits that he has a special affection for female protagonists. "I love to draw women, but I like to portray them as strong-natured women. I never feel that I've been exploitative in the past; I just think it makes the stories more intense when you have a female character who kicks butt and more than takes care of herself." Obviously his female protagonists have attracted attention from others as well, since his ***Adrenalynn*** has been picked up by *Joel Silver* and Warner Bros, with *Christina Ricci* already attached to the project. Daniel is already working to adapt ***Silke*** to the silver screen as well.

Silke #1, a $2.99 comic, is scheduled for January 10th release; the first is offered with two different covers, both by Daniel.

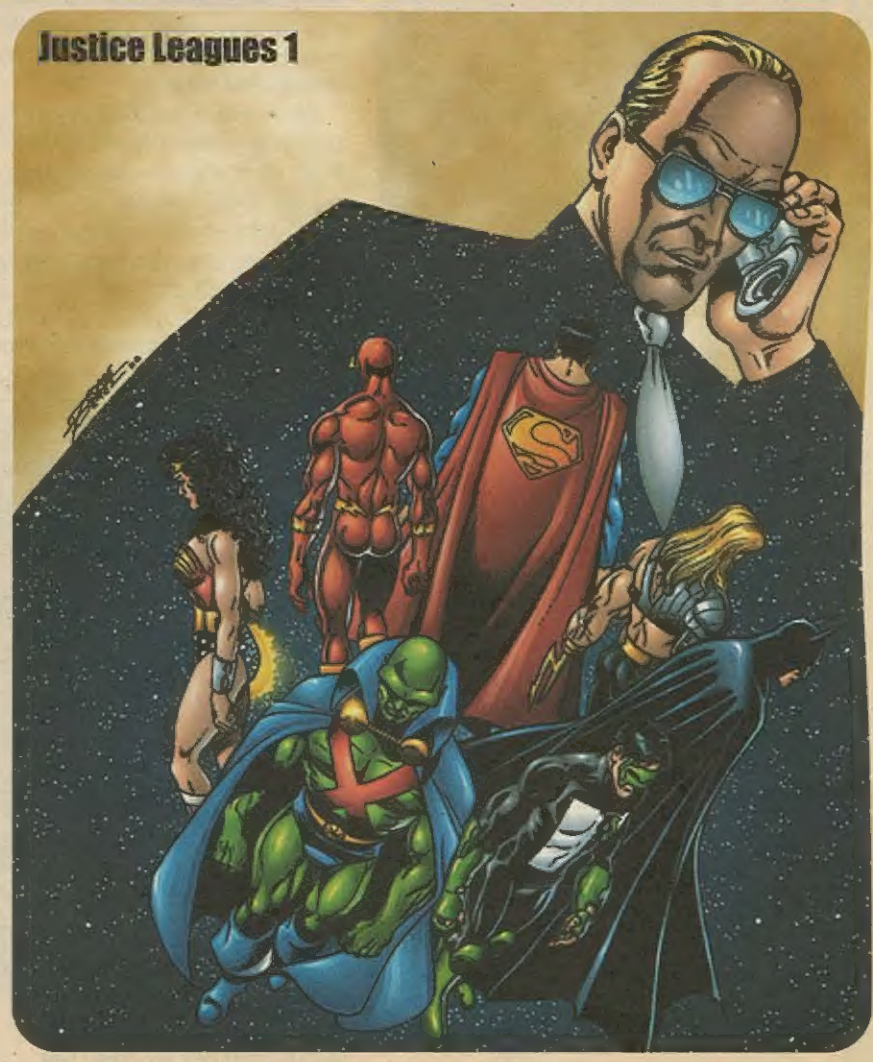
Advance Info is Bad News for JLA

Sometimes it's good to know things in advance—but it's not necessarily good to know the Advance Man (who fans first met in ***JLA Secret Files*** #3). No, he's not a new source of news 'n' info; instead, he's the harbinger of a whole world of troubles for the JLA as he pays a visit to Earth to scope out our planet as an advance man for a world-menacing threat —and to make their assault easier to removing the most daunting obstacle in their way.

But how do you get rid of the JLA? Do you combat them? That hasn't worked too well for a whole host of super-villains. No, what you do is simple enough: you eliminate them! Not by killing them, mind you, but by making the team cease to exist... and that's just what the Advance Man does in Justice Leagues, a fifth-week event running through the last three weeks of January.

The Advance Man's plan seems elegant in its simplicity: arrange for everyone on Earth to forget that the JLA ever existed—and that "everyone" includes the seven core members of the superteam! That way, the client who has hired the Advance Man can face the heroes one at a time rather than having to deal with a super-gestalt. But what he learns is that you can take the heroes out of the team, but you can't take the team out of the heroes!

The action begins in ***Justice Leagues*** #1, by *Tom Peyer, Ethan Van Sciver,* and *Matt Martin*. The Advance Man arrives to begin transforming the Earth into a more suitable home for his client... even though his changes could endanger every being on our planet. To ensure that he is able to act with relative impunity, he wipes out the knowledge of the JLA—but that leaves some sort of void in the collective unconscious of the former JLA members, and they soon fill that void with teams of their own distinctive creation.



Wonder Woman calls on Supergirl, the Huntress, Black Orchid, Zatanna, Big Barda, and Power Girl to form the basis of her new team in ***Justice Leagues: Justice League of Amazons***, by *Len Kaminski, Aluir Amancio,* and *Claude St. Aubin*. Their goal is to protect our world... and while it seems that they have the muscle to pull it off, they seem to lack the balance of strength and judgment necessary to succeed.

Meanwhile, Aquaman's making some waves of his own in ***Justice Leagues: Justice League of Atlantis***, by *Len Kaminski, Javier Saltares,* and *Mark Propst*. The King of the Seven Seas puts together an appropriately aquatic team comprised of Tempest, Mera, Arion, Lori Lemaris, Devilfish, and Power Girl to save his underwater world—but his extremism makes success elusive.

Batman calls on some surprising "allies" in ***Justice Leagues: Justice League of Arkham*** by *Paul Grist, Coy Turnbull,* and *Dan Davis*. His team consists of Catwoman, the Riddler, Poison Ivy, the Ventriloquist, and the Joker—not Batman's usual teammates by any means! In fact, the choice makes Robin wonder if Batman's lost the sense of judgment and balance that made him a successful hero to begin with. This book also features a second team, the Flash's Justice League of Adventure.

Superman heads up an interplanetary team in ***Justice Leagues: Justice League of Aliens***, by *Judd Winick, Mike Miller,* and *Armando Durruthy*. His allies include the Martian Manhunter, Orion, Starfire, Warrior, Mikaal (the blue alien Starman), and Lobo. But there diverse backgrounds may be the team's undoing. Look for a guest appearance by the Justice League of the Air, headed by Green Lantern, in this issue.

The team comes back together again in ***Justice Leagues: Justice League of America***, by *Tom Peyer* and *Justiniano*. The Advance Man has done his job, and now his client Plura is ready to take over our world. Each of the replacement JLA's has proven inadequate to stop the invasion—but Superman might prove the key to recreating the real JLA before it's too late.

Justice Leagues #1 kicks off the storyline on January 17th; the four alternate-JLA oneshots follow a week later; and the series comes to a close with ***Justice Leagues: Justice League of America*** on January 31st. Each book carries a $2.50 pricetag—and to ensure that no one overlooks these books on the racks, DC has enlisted superteam artist par excellence George Pérez to supply the cover art for all six books.

For Those Who Have Never Metabaron...

If you've never previously sampled *Alexandro Jodorowsky* and *Juan Gimenez*'s ***Metabarons***, the folks at Humanoids Publishing are making it easy for you: they're compiling the first five issues of the series in ***Metabarons: Path of the Warrior***.

"We need to ship this collection as quickly as possible, so that we can meet the increasing demand from retailers and readers," *Dave Olbrich*, Humanoids U.S. Director of Publishing, said. "The company was very aggressive in its overprinting of the standard-sized comics, but in recent months, re-order activity for every issue of ***Metabarons*** has been very brisk. As the sales of new issues went up, re-orders for back issues increased dramatically as well. This trade paperback will fill a definite need."

The series was recently praised by *Warren Ellis*, who said, "What keeps me going back to the ***Metabarons*** is the immense volume and speed of its innovation. There is literally a new and mad idea on every page."

Metabarons: Path of the Warrior is slated for March release.

Ale Garza, Ninja Boy!

Haven't heard of ***Ninja Boy*** yet? Don't be embarrassed—very few people have. But that should change in 2001, according to a recent posting by artist *Ale Garza*, who is optimistic that the book will appear next summer under the WildStorm imprint.

"With ***Ninja Boy***, we hope to accomplish this big Disney feel... Visually I plan to do some different things—grey line art, painted backgrounds with cell-like figures. It'll be fun; I can't wait to put it out there for you all...

"Don't expect some hardcore story about honor and crap like that; expect something more along the lines of those cool old karate flicks—lotsa fun with lotsa hardcore, cartoony violence and gore. Oh yeah—and don't even *think* about comparing it to Shidima or ***No Honor***."

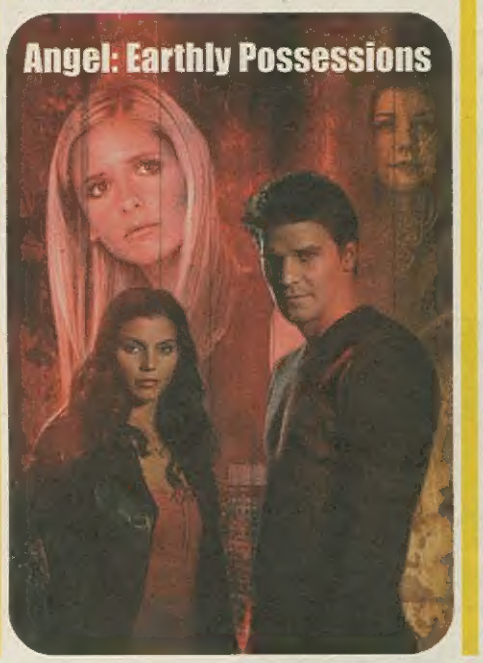
Garza confirms that "***Ninja Boy*** is in final negotiations to be published through WildStorm for June... As for who's writing it—well I'm kinda breaking a long-time friend into the biz. His name's Allen Warner; were actually working on a ***GenActive*** story together right now. I can honestly say he's very talented; I wouldn't work with anyone who I don't believe is capable."

More news on ***Ninja Boy*** as it develops!

Upcoming Comics—Dark Horse in March

Angel joins forces with Father Noe, an excommunicated priest who's particularly good at driving out demons, in ***Angel: Earthly Possessions***, a trade paperback that reprints ***Angel*** #s 5-7.

Francisco Ruiz Velasco's sleeper hit ***Battle Gods*** is compiled in a hefty 240-page edition. ***Battle Gods: Warriors of the Chaak*** will feature the entire limited series, along with profiles of all of the major characters and background on the actual Mayan legends on which the series is based.



Rin and Manji join forces with a misfit band of killers looking for vengeance against the Itto-Ryu in ***Blade of the Immortal: Heart of Darkness***, a 240-page compilation of the acclaimed eight-issue story arc.

Smokey Stover is the latest comic strip hero to join Dark Horse's line of syrocco-styled statues. ***Classic Comic Characters #21: Smokey Stover Statue*** is packaged in full-color tin box w/certificate, pinback button, and info booklet, and is limited to six hundred copies.

Dark Horse Comics and Koto, Inc., join forces to produce the first-ever ***Hellboy Soft Vinyl Figure***. The 13.75" tall fully painted figure, based on designs *Katsuya Terada*, is slated for simultaneous worldwide release in May.

Joker/Mask, the offbeat series by *Henry Gilroy, Ramon F. Bachs*, and *Howard Shum*, gets the trade paperback treatment this month. Find out what happens when the Joker gains the power of the Mask.

Winsor McCay's Little Nemo gets his own lunchbox this spring—a perfect way to carry one's rarebit to snack on! The ***Little Nemo in Slumberland Lunchbox*** features watercolored art by McCay on a metal box.

Phil Amara, Guy Davis, and Dave Stewart's ***The Nevermen*** introduced readers to a group of mysterious heroes whose origins and motives remain a mystery to all who cross their paths. Now you can get to the bottom of the mystery in ***The Nevermen***, a trade paperback that also includes the hard-to-find Nevermen tales from ***Dark Horse Presents***.

The Hunt for Aurra Sing begins in ***Star Wars*** #28 as *Tim Truman, Davide Fabbri*, and *Christian Dalla Vecchia* kick off a four-part story arc. When Sing kills Jedi within the very shadows of the Temple on Coruscant, several Jedi Knights vie for the honor of bringing the assassin down.

Want to sit in on a conversation involving some true comics legends? Then ***Will Eisner's Shop Talk*** is the book for you! This 250-page trade paperback features Eisner conducting insightful interviews with such greats as *Jack Kirby, Joe Simon, Gil Kane, Joe Kubert, Jack Davis, Neil Adams, C.C. Beck, Milton Caniff, Gill Fox, Harvey Kurtzman*, and direct-sales founder *Phil Seuling*. These interviews haven't been in print since they initially appeared in ***Spirit Magazine*** and ***Will Eisner Quarterly***.

Andromeda Is Raven About the Addition of Traci Lords

Traci Lords has signed on as a cast member of the Sci Fi Channel's series ***First Wave***—and even though she hasn't appeared on-screen yet, she's already being worked into the Andromeda Entertainment comic book series. Lords' character will be the focus of ***First Wave: Jordan Radcliffe—The Raven***.

"Lords portrays Jordan Radcliffe, the mysterious and sexy leader of a militia force known as the 'Raven Nation,' who has dedicated her life to hunting and destroying the alien menace known as The GUA," Andromeda editor-in-chief *Art Holcomb* said. "Early in Season 3, Radcliffe and principal character Cade Foster rapidly develop something of a love-hate relationship, and Andromeda Entertainment will be there every step of the way to bring that excitement into the comic book world.

"Science fiction comic book adaptations often miss the opportunity to contribute powerful new stories to the show's universe. Many of them don't want to—or aren't allowed to—create tales that offer the same entertainment experience as the shows or films they're supposed to be celebrating. For fans and creators alike, it's a frustrating experience. That's not going to be the case with Andromeda, and ***First Wave: Jordan Radcliffe—The Raven*** is a great example of what we're trying to do. We're working very closely with the creators of the show to ensure not only that we're telling great stories, but that they're in keeping with what fans of the series have come to expect—an d then some!"

Holcomb points out that the story isn't a prequel to the character's first appearance on television, nor is it set after her first appearance; instead, the tale actually takes place during the episode in which Jordan Radcliffe debuts! "Our special issue works as an excellent stand-alone introduction to Traci's character, but for the fans who both see the episode and read the comic, there will be a superb entertainment experience. A lot of her background will be seen for the first time in the comic," Holcomb said.

Look for ***First Wave: Jordan Radcliffe—The Raven*** in February; the book is written by *James Anthony*, illustrated by *Dan Parsons*, and features a cover by painter *Matt Busch*.
